Aditya Nawal

User Experience Designer

I bring an engineer's mindset and a designer's eye to craft experiences that feel intuitive and act reliably, especially where money's involved. With a background in computer science and hands-on work across product, interaction, and system design, I care deeply about how things behave, break, and build trust. I'm driven by curiosity, a need to fix what feels off, and continuous urge to make things just click.

EXPERIENCE

Quicko, Product Designer

Jan 2024 - Present | Ahmedabad, India

Worked across Quicko's Income Tax platform, mobile app (glyde), and Pro product to design key workflows for File, Save and Investments module. Built the Pay module and Home from the ground up. Led design for Dashboard, Earnings, Bookings, and core entities in Quicko Pro. Designed glyde with a mobile-native approach & design system, standardizing tokens, type scales, and interaction patterns, while aligning behavior with Material Design in close collaboration with engineering.

Sandbox, Product Design Intern

Jan 2024 - Jul 2024 | Ahmedabad, India

In parallel with Quicko, shaped the Console home for Sandbox's developer platform. Defined interface patterns for quota limits, subscriptions and billing flows.

Flits, Product Design Intern

May 2023 - Jul 2023 | Ahmedabad, India

Designed and shipped core features and marketing pages for Flits, some of which are now live on getflits.com. Built a structured onboarding flow that guided new users through wallet setup, rewards, and key actions—helping them get started with clarity.

EDUCATION

Dhirubhai Ambani Institute of Information and Communication Technology (DAIICT)

B.Tech, Information & Communication Technology with minor in Computational Science | Aug 2020 - June 2024 | Gandhinagar, India

Convenor at Muse (Design Club), led design initiatives across campus and mentored juniors. Actively contributed to tech and cultural spaces through DCEI, TechSupport, i.Fest, IEEE SB, and Music Club.

SKILLS

Design & UX

Interaction Design
Visual Hierarchy
Moodboarding
Microcopy
Prototyping
Design Systems
Cross-functional Collaboration

Research & Behaviour

User Interviews
Usability Testing
Journey Mapping
Edge-case Reasoning

Technical

HTML / CSS / JS
Angular & React (starter)
Tailwind
Git
Postman
AWS (S3 · Lambda · CloudWatch
NoSQL Modelling)

Finance

Tax Planning
Income Tax
Retirement Instruments
Account Aggregator Ecosystem
GST Infrastructure
API-led Product Design in Finance
